

RYLSON 8 Enterprise Asset Management & Reliability Software

Top: Business Process Flowchart
Left: Rylson8 Activity Based Budget Reports

Whole of life asset management

Rylson8 has been designed to offer a holistic view of the assets over their entire lifecycle. This ensures that the organization can deliver the business requirements at the lowest operational cost. No matter what stage you are in the asset lifecycle, Rylson8 delivers solutions to get the maximum reliability and availability from your assets at minimum risk.

Proven to deliver sustainable cost savings

Developed based on International Asset Management standards such as PAS 55 and ISO 55000, Rylson8 focusses on the activity layer to ensure that decision making delivers sustainable benefits. A range of inbuilt wizards guides the user through structured Reliability Centred Maintenance (RCM) processes to achieve the expected outcomes.

Tailored to your needs

Whatever your business we can design a software solution to meet your needs. We have worked with a range of clients to customize the offering based on your internal requirements. Rylson8 is a modular application that can be deployed in a range of scenarios with an array of licensing options from single user to corporate enterprise licenses. Rylson8 inter-operates with your CMMS such as Ellipse, SAP and MAXIMO, among others.

FEATURE OVERVIEW:

MODULES

- Plant Hierarchy
- Criticality Analysis
- Maintenance Strategy Optimisation
- Maintenance Costs
- Operational Costs
- Lifecycle Simulation (LCS)
- Total Cost of Ownership (TCO)
- Critical Spares Analysis
- Maintenance Reports

APPLICATIONS

- Develop First Principle Reliability Centred Maintenance (RCM) Strategies
- Maintenance Strategies Optimisation (MSO)
- Understanding of your Asset Criticality
- Develop whole of life activity based budgets (OPEX)
- Know the Inherent Capability of your Assets
- Assess the economic replacement interval for your assets (CAPEX)
- Determine critical spares holdings

1.PAS 55 is the British Standards Institution's (BSI) Publicly Available Specification for the optimized management of physical assets
2.ISO 55000 is the International Organization for Standardization Asset Management standard
